

Make Stormy's Hat!

Step 1: Print out the templates on the last two pages, preferably out of cardstock or heavier-weight paper (regular paper also works just fine).

Step 2: Cut out the hat, brim and band. Note that you may have to cut a longer band based on your child's head!

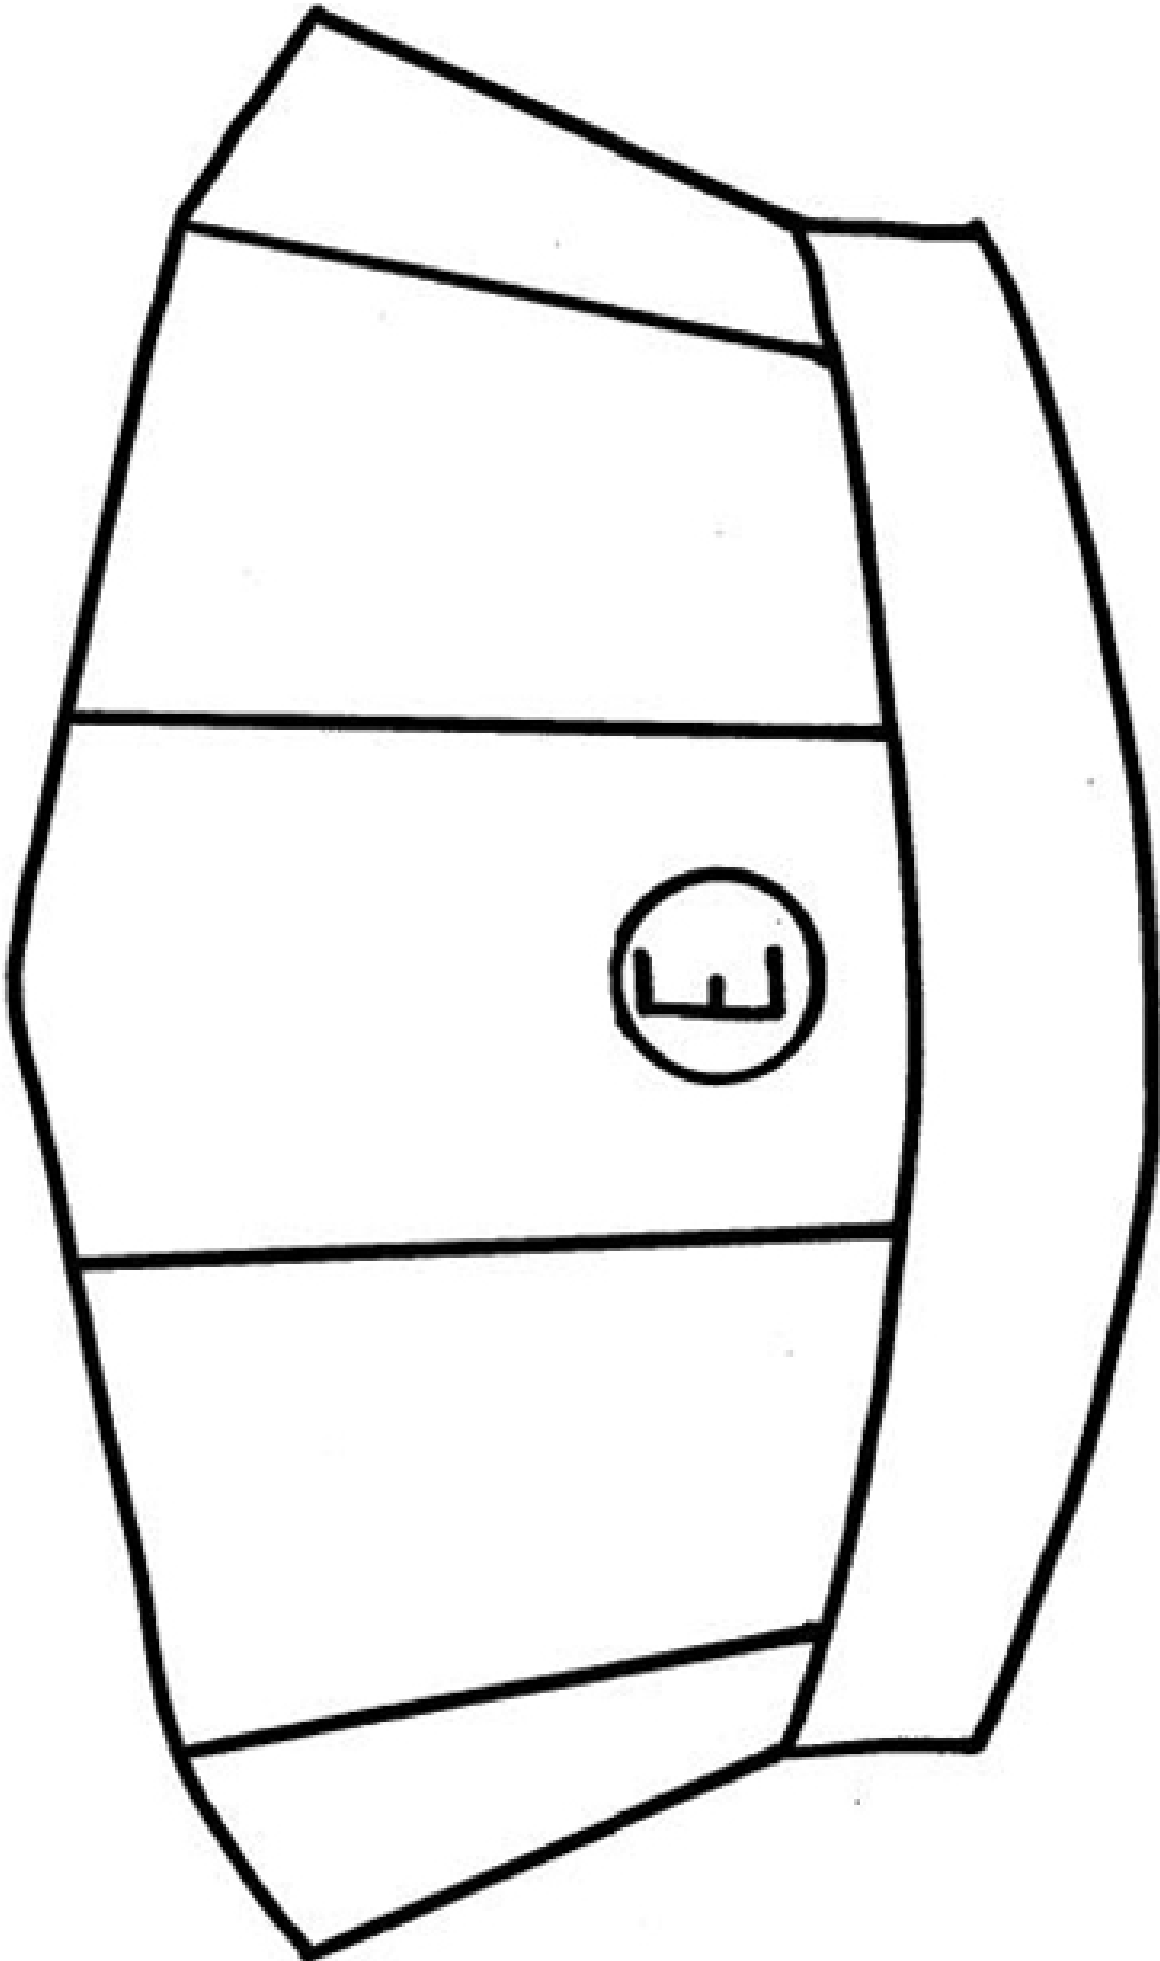

Step 3: Color in the hat and brim. We recommend Engineer Blue!

Step 4: Snip the tabs along the brim so you can easily bend the paper.

Step 5: Tape or glue the brim to the hat, using the tabs to affix the hat to the brim. You may have to adjust it so it takes a round shape, with the brim flipping straight out.

Step 6: Attach the band to the hat, by tape or staples.

Step 7: Put on your head and enjoy being an engineer!
